

Kids' Shoe Fit Guide

How to find your child's size:

1. Print the fit guide. If a penny fits in the circle below, you've printed it correctly.

- 2. Lay the fit guide on the ground and place your child's foot on top of the ruler, making sure to align their heel with the edge of the curved line.
- 3. Place a mark on the first visible line past the longest toe.
- 4. Circle the measurement to the right of the line you just marked.
- 5. Once you've found the shoes you intend to purchase, click on the "Size Chart" link below the price to view the brand's sizes and measurements.
- 6. Using that size chart and the measurement you just circled, find the appropriate size. We recommend ordering a half size up to leave room for your child to grow.
